DETAILED ACTION

Election/Restrictions

1. Applicant's election of Species disclosed in figure 24, in the reply filed on 02/05/2007 is acknowledged. Nott et al discloses the claimed invention in figures 5, 5A, and 7, an elongated member (134) having a first end portion configured to extend exterior of the body lumen; a body (10,170) attached to the second end portion of the elongate member (134); a pair of rib members (drawing below) extending distally from the elongate body (134) and branching into a pair of proximal ring members (drawing below); wherein each proximal ring member branching into pairs of distal ring members (at 184,186) to thereby define pairs of adjacent distal ring members (at 184,186) converging into a plurality of single members (176) which converge to define a distal end of the body and furthermore, wherein the proximal ring

members are connected to the distal ring members (184,186) via plurality of links (shown drawing below).

Art Unit: 3734

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Dormia (U.S. 4,347,846).

Dormia discloses substantially as claimed in figures 1-3, an elongated member (2,3) having a first end portion configured to extend exterior of the body lumen; a body (8) attached to the second end portion of the elongate member (2,3) and wherein the body (8) including proximal and distal portion and midsection.
